PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence and Data Science with hands-on experience across the LLM lifecycle, machine learning, and computer vision. Completed an internship at Ethara AI contributing to data preparation and evaluation for LLM post-training workflows, alongside independent projects reaching 97%+ model accuracy. IBM-certified in Business Intelligence, Data Visualization, and DevOps & Agile. Presented research at a national-level technical symposium. Seeking AI/ML internship or research opportunities to apply data-driven, human-in-the-loop problem-solving skills.

EXPERIENCE

LLM Post-Training Intern — Ethara AI

Feb 2026 – May 2026

- Prepared and evaluated data for AI/ML projects supporting Large Language Model (LLM) post-training workflows, ensuring outputs met human-aligned data quality standards.
- Reviewed and assessed model-generated responses as part of the post-training evaluation pipeline, contributing to model alignment and fine-tuning efforts.
- Collaborated within a remote data-and-AI team, following structured guidelines to maintain consistency and accuracy across evaluation tasks.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2024 – 2028

Sanjivani University, Maharashtra | CGPA: 7.93 / 10 (current)

TECHNICAL SKILLS

- Programming Languages: Python, Java, SQL, C++, R
- AI & ML: Machine Learning, Deep Learning, NLP, Computer Vision, Data Science
- Libraries & Tools: TensorFlow, OpenCV, Scikit-learn, Git, Streamlit
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Business Intelligence, Statistics

PROJECTS & RESEARCH

PredictiX – Disease Prediction Web Application

- Built an intelligent, user-friendly web app delivering preliminary predictions for three chronic diseases: Diabetes, Heart Disease, and Parkinson's Disease.
- Tech Stack: Python, Streamlit, Pandas, Scikit-learn, XGBoost, Seaborn, Matplotlib, Pickle.

AI Sign Language Interpreter (Computer Vision)

- Built a real-time sign language to text & speech conversion system using CNN-based deep learning models, achieving 97%+ accuracy.
- Tech Stack: Python, OpenCV, TensorFlow, MediaPipe.

Attendance Tracker Using Python (CLI Application)

- Designed a CLI-based attendance system using Python OOP principles with real-time marking and record retrieval via timestamps.

MeetMate – AI Meeting Assistant

- Developed an AI-powered meeting assistant using NLP to analyze user inputs and preferences.
- Implemented recommendation logic to suggest optimized meeting schedules and interactions, with a focus on intelligent automation and user-centric design.

ACHIEVEMENTS & CERTIFICATIONS

- IBM Certification — Business Intelligence
- IBM Certifications — Data Visualization, DevOps & Agile
- Generative AI Fluency — NASSCOM FutureSkills Prime
- Teckcluster'25 — National-Level Paper Presentation
- Eureka Startup Pitching Competition — Organized by Sanjivani EDC (Aug 2025)
